## PROJECTS

---

### Gamming - mania (gamming based website) [ Html, CSS, JavaScript ]

- This offers a standard platform for accessing different games and competitions.
- Players can apply for various gaming tournaments on this platform and register for upcoming events in the register section.
- This comprises of a login page that is responsive, a **service page**, and a **registration page**.

### AIRLINE RESERVATION SYSTEM (airplane reservation website) [ Html, CSS, JavaScript ]

- Worked in a two-person team to design and execute a website.
- It is a simple user interface for books and manages reservation for domestic and international flights.
- It is **inspired by** two popular websites (**Akasa & Ixigo**) in order to display our web development skills and create a new platform for airline reservations along with some other pages.

### Task-Manager-editor [ Html, CSS, JavaScript ]

- The project is being created for the company "**Deep Thought**".
- Developed and implemented a **highly-responsive task management system** with advanced functionalities, including a dynamic notice board and intuitive taskbar.
- Users can add and remove threads and sub-threads using the **Thread box**.
- There is a custom-built **rich Text Editor**.

### Tech-Info (Landing page Template) [ Html, CSS, Bootstrap5, JavaScript, AOSjs ]

- Essentially, it is a website template for educational or instructive websites.
- The **AOS JavaScript library** is used to implement **scrolling motion**.
